

Heat pump
connection
Swimspa

On each swimspa the heat pump connection you can find near the control box.

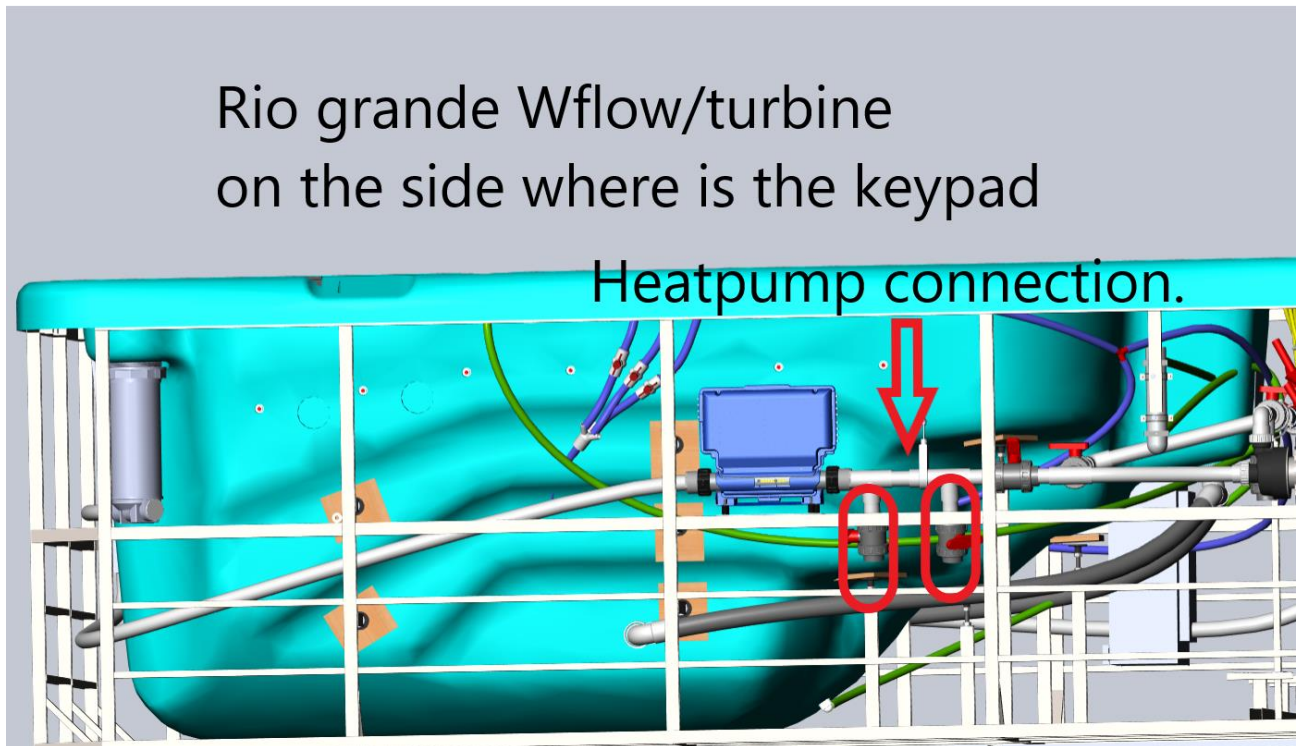

Danube W-flow or Turbine:

Amazonas W-flow of Turbine:

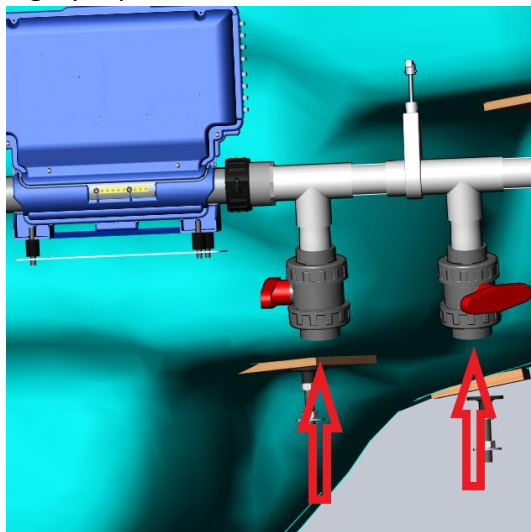

RioGrande W-flow of Turbine:

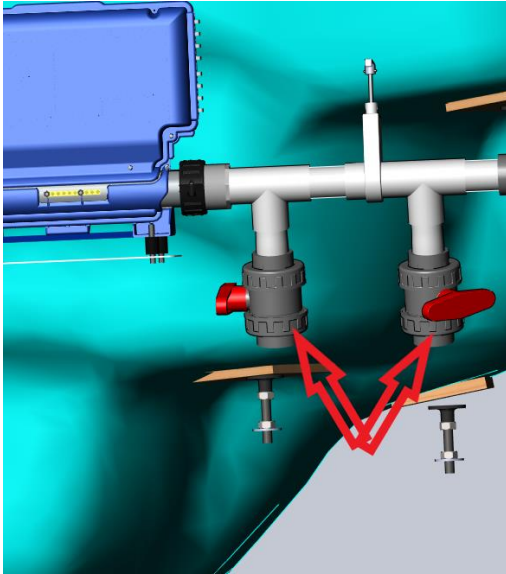

After connection to can switch the system to heatpump you have to do the following:

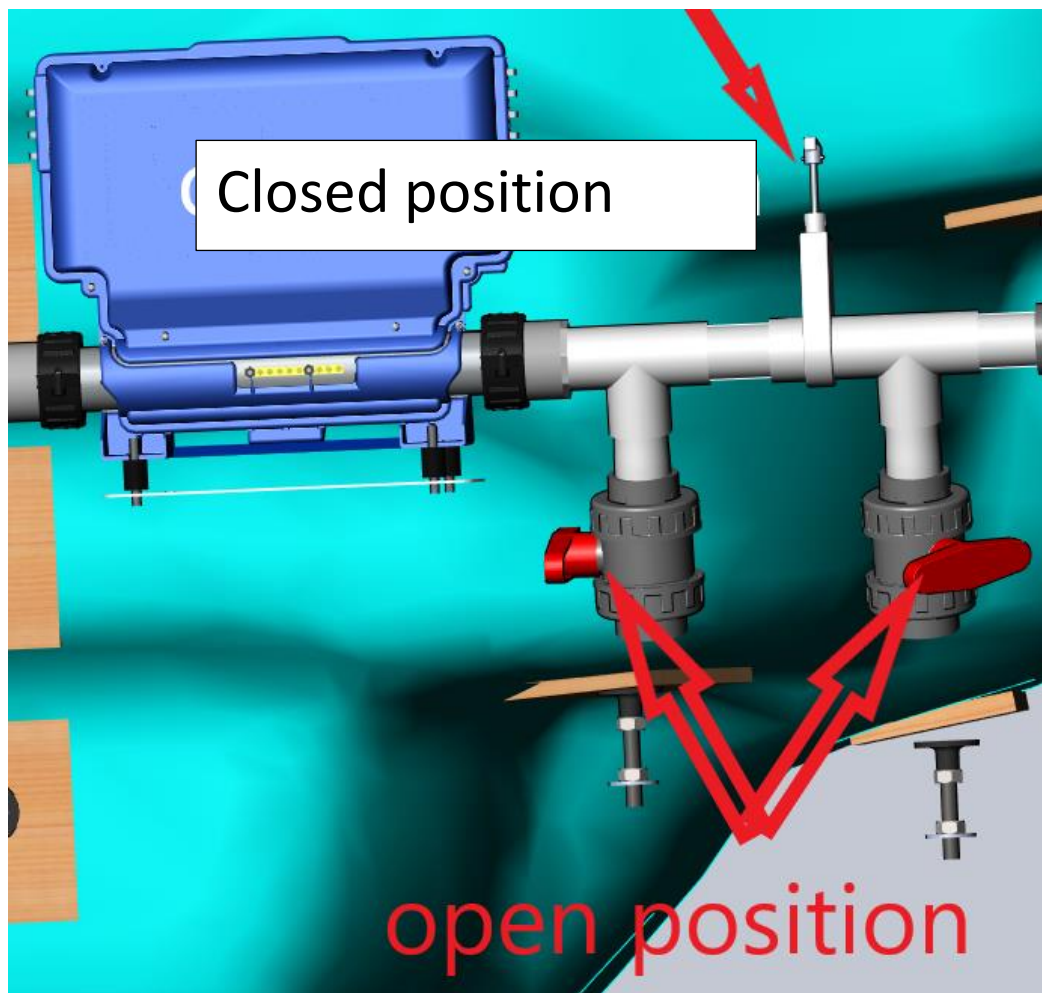

- connect the pipe to the gray tap

- after connecting the pipe (leave 10 min for the glue to dry), get down the hollanders and fill the system with water (deair it)

- connect the Hollander to the tap
- open the taps shown in the picture (gray) and close the tap on the top (white)

Now the system is ready to work with the heatpump.
